This T1 Pro TAC is a mini tactical flashlight. Although it is only 9.7 cm, But can throw 290 meters and has 21,060 candela. Use one AA alkaline battery and NiMH battery, or you can add a BB7 extension tube to use two alkaline batteries or NiMH batteries to increase the brightness; you can also use one 14500 lithium-ion battery, which can reach 540 lumens. Comes with a stainless steel pocket clip that can be mounted on the flashlight body in two directions, making it easy to carry.

The T1Pro TAC has excellent throw and has a large area of spill; the tail forward switch allows frequent momentary and maintains high mode all the time. This flashlight also hides a low mode, which allows you to view documents and equipment at close range in dark environments to maintain dark adaptation and situational awareness, especially suitable for lightweight tactical use.
