

F8R "The Pilgrim" Rechargeable LED Flashlight

The F8R is a rechargeable long-range LED flashlight featuring a patented waterproof and dustproof USB-C charging structure. It uses a high-capacity 11,000mAh full-tab lithium-ion battery, providing extended runtime. The high mode delivers 1,000 lumens with a constant brightness for 2.5 hours. At full power, it outputs 1,600 lumens with 200,000 candela, achieving a beam distance of 894 meters, and includes a strobe function. The side electronic switch features a battery level indicator, and the charging port includes a charging status indicator. With 15W fast charging. The flashlight is equipped with a switch lock function to prevent accidental activation. The F8R can be stored in the Weltool FH4 flashlight holster and mounted on a duty belt, making it particularly suitable for outdoor search, rescue, law enforcement, patrol, and similar applications.

Performance and Specifications:

CNC machined T6 series aluminum alloy with hard anodized surface

Aluminum alloy reflector and coated tempered glass lens

Single high-power white X-LED light source

Output:

	Full-power	High	Medium	Low	Eco	Strobe
Light Output (lumens)	1,600 lm	1,000 lm	600 lm	200 lm	14 lm	N/A
Beam Intensity	200,000cd	128,000cd	72,610cd	24,650cd	1,490cd	N/A
Beam Distance	894 m	715 m	538 m	314 m	77 m	N/A
Runtime	3h16min	3h45min	6h47min	19h36min	288h17min	N/A

The above data was obtained through testing with the Weltool INR26-110 lithium-ion battery under normal temperature conditions. Different testing environments and conditions may affect the results, and the data is for reference only.

features:

- The flashlight has battery over-discharge protection, battery reverse connection protection, low voltage reminder function, and low voltage cut-off protection function
- Full power mode has overheat protection function; the flashlight has no flicker, no noise, and low standby current
- Patented USB charging structure, waterproof and dustproof; the USB port waterproof cover has a magnet, and the waterproof cover can be adsorbed on the tail cover when charging
- IP67, can be used in heavy rain
- Passed the 1-meter height drop test
- Each flashlight has an independent serial number

- Weight: 382±1g (including battery)
- Dimensions (±0.5mm): (head diameter) 41.5mm, (barrel diameter) 30-33mm, (length) 192mm
- Included: 1 INR26-110 lithium-ion battery, Type-C charging cable, O-ring

Operating Instructions:

1. First, install the battery correctly. This product can only use 1 Weltool INR26-110 lithium-ion battery.
2. The flashlight has a polarity protection function. If it does not work, please check whether the battery is reversed in time.
3. Press the switch to turn on or off the flashlight.
4. After turning on the flashlight, press and hold the switch, the flashlight will automatically switch to different modes. Release the switch to select the current mode and keep it; double-click quickly in shutdown or any mode to enter full power mode, and triple-click quickly to turn on strobe. After the flashlight is turned off, the mode before shutdown will be memorized (but full power and strobe are not memorized).
5. At the moment of power on or during use, the power indicator will turn on (green light when the power is sufficient, red light when the power is low, and the indicator will automatically turn off after 5 seconds); when the power is very low, the red light will keep flashing, and the main light of the flashlight will also flash, and then the flashlight will turn off at any time.
6. The power can also be tested when the flashlight is locked: press the switch once, and the power indicator will turn on.
7. The charging port has a charging status indicator light. The red light means it is charging and the green light means it is fully charged.

Switch lock and unlock function:

In the off state, long press the switch for more than 5 seconds to lock, and the indicator light and main light on the switch button will flash 3 times at the same time to indicate that it has been locked; after locking, the flashlight will remember the lock state and mode, and you need to unlock it when replacing the battery again.

After locking, long press the switch for more than 5 seconds to unlock, and the main light will turn on in memory mode after unlocking.

Tips:

1. Do not disassemble the parts by yourself, otherwise it will cause the warranty to be invalid and may damage the flashlight.
2. It is normal for the flashlight to heat up when working. When the hand feels hot, please switch to a lower mode in time to ensure that there is no burn.
3. When the flashlight is turned on, please keep away from flammable

objects, do not expose eyes and skin, and store away from children.

4. The O-rings at the end of the flashlight body and the waterproof cover may age with the frequency and time of use. Please replace them in time to maintain the waterproof performance.

5. When the flashlight flashes abnormally or does not work, try to clean the conductive contact surface with an alcohol cotton swab.

6. This flashlight has excellent waterproof performance, but it cannot be used for diving.

7. It is strictly forbidden to knock, drop, immerse in water, disassemble, or short-circuit lithium-ion batteries, otherwise it may cause the batteries to heat up, catch fire, or explode.
