

W7 “The Prodigal ”LEP tactical flashlight

W7 is a long-range LEP tactical flashlight with spill, 700 lumens, 800,000 candela, and a throw distance of 1,788 meters! W7's LEP light source complies with IEC 62471 Exempt and IEC 60825 Class 1. The innovatively designed reflector optical structure makes its beam not only have the high candela characteristics of the LEP light source, but also has a large area of spill. The default power-on mode is high mode, hiding the strobe and low. W7's spill allows users to effectively maintain dark adaptation and have better situational awareness, and the hot spot can be thrown farther, suitable for rescue, tactics, search and other purposes.

Product features:

Aluminum alloy CNC processed, surface hard anodized

Aluminum alloy reflector and coated tempered glass lens

Special LEP module, 5700-6700K color temperature, life of about 10,000 hours

Output:

	High	Strobe	Low
Light Output	700 lumens	N/A	195 lumens
Beam Intensity	800,000 candela	N/A	246,200 candela
Beam Distance	1,788m	N/A	992m
Runtime	2h40min	N/A	3h54min

(Tested with Weltool UB21-50 rechargeable lithium-ion battery, outdoor, constant on, below 25 degrees Celsius, Different test environments and standards may vary and are for reference only.)

Uses 1 21700 lithium-ion rechargeable battery

Tail button forward switch, 50,000 press lifespan

High-efficiency drive circuit, no noise and no flicker

With temperature control protection, with polarity protection

With low voltage prompt and battery over-discharge protection function

Passed 1-meter drop test

IP67

Each flashlight has a unique serial number

Dimensions (±0.5mm): (head diameter) 41.5mm, (tail cover diameter) 32.8mm, (length) 174.5mm

Weight: 199.5±0.5g (excluding battery)

Included: UB21-50 lithium-ion battery, Type-C charging cable, O-ring, stainless steel pocket clip

Instructions:

1. First install the battery correctly
2. Half-press the tail switch button once to turn on the high mode, release it to turn off, even if this operation is frequent, it will be high. At this time, press the switch hard to make a "click" sound to keep working continuously, and press the "click" again to turn off the flashlight.
3. The hidden mode can be activated by half-pressing more than 4 consecutive times in the off state. When the hidden mode is turned on, the strobe is first. At this time, release the switch and then half-press it to switch to low immediately. Low and strobe can be switched in a cycle. Press the switch firmly to lock the strobe or low continuous operation; in the hidden mode, it will automatically exit the hidden mode and return to the high mode after shutting down for more than 1.5 seconds.
4. When the battery power is low, the main light of the flashlight will flash to remind you, please charge the battery in time.
5. When the battery power is exhausted, the flashlight will automatically stop working.

Use suggestions:

- Do not disassemble the parts by yourself, this will void the warranty and may damage the flashlight.

- It is normal for the flashlight to heat up when it is working; however, it is only recommended to use it in an environment where the outdoor ventilation (wind speed exceeds 5m/s) and the temperature is below 25 degrees Celsius! Turn off the flashlight in time when the hand feels a lot of heat, turn it on again after the flashlight cools down.
- After long-term use, please replace the O-ring in time to maintain waterproof performance.
- Applying too much grease to the threads at the end of the flashlight body may cause electrical conduction problems.
- Please clean the conductive contact surface of the flashlight in time to ensure the normal operation of the flashlight.
- We recommend that you remove the batteries and recharge the batteries at least every 2-3 months when you will not use the flashlight for an extended period of time.
- This flashlight has excellent waterproof effect, but it cannot be used as a professional diving flashlight.
- Do not aim the beam at the eyes and skin to avoid vision damage or skin burns, and keep away from children.
