Warranty Service

All NITECORE® products are warranted for quality. DOA/defective products can be exchanged for replacement through a local distributor/dealer within the 15 days of purchase. After 15 days, all defective / malfunctioning NITECORE® products will be repaired free of charge for a period of 60 months from the date of purchase. After 60 months, a limited warranty applies, covering the cost of labor and maintenance, but not the cost of accessories or replacement parts.

The warranty is nullified in all of the following situations:

1. The product(s) is/are broken down, reconstructed and/or modified by unauthorized parties.
2. The product(s) is/are damaged through improper use.
3. The product(s) is/are damaged by leakage of batteries.

For the latest information on NITECORE® products and services, please contact your national NITECORE® distributor or send an email to service@nitecore.com

※ The Nitecore official website shall prevail in case of any product data changes.

(English) Concept 1 User Manual

Features

- Ultra-high output in a small size flashlight
- Utilizes an OLEO XHP35 HD E2 LED with a max output of up to 1800 lumens
- Max beam intensity of up to 12,100cd and max distance of up to 220 meters
- Crystal Coating Technology combined with "Precision Digital Optics Technology" for extreme reflector performance
- Max runtime of up to 300 hours
- Built-in ATR module controls 5 brightness levels and 3 special modes
- With integrated power circuit, the Concept 1 blink to indicate remaining battery power and reports battery voltage to the nearest ±0.1V
- Features intelligent memory function (except for SOS and location beacon modes)
- High efficient constant current circuit board provides constant illumination
- The built-in ATR module automatically regulates its output and adapts to the ambient environment to maintain optimal performance
- Reverse polarity protection
- Toughened ultra-clear mineral glass with anti-reflective coating
- Magnetic tail cap with stand capability
- Quick release belt clip with HAIII military grade hard-anodized finish
- Waterproof in accordance to IPX8 (two meters submersible)
- Impact resistant to 1.5 meters

Dimensions

Length: 111.5mm (4.39")

Head Diameter: 24.5mm (0.96")

Tail Diameter: 23.8mm (0.94")

Weight: 61.9g (2.18oz) (without battery)

Accessories

Holster, clip, lanyard, spare O ring

Battery options

	Type	Nominal voltage	Compatible
NITECORE IMR18650 3100mAh 35A	IMR 18650	3.7V	Yes (Recommended)
Rechargeable IMR18650 Li-ion Battery	IMR 18650	3.6V	Yes (Recommended)
18650 Rechargeable Li-ion battery (output current higher than 8A)	18650	3.7V	Yes
Primary Lithium battery	CR123	3V	Yes
Rechargeable Li-ion battery	RCR123	3.7V	Yes

Output & Runtime

F1I STANDRAD	Turbo	High	Mid	Low	Ultralow
1xCR123	1800LUMENS	810LUMENS	300LUMENS	80LUMENS	1LUMEN
① x1IMR18650	*30min	*1h30min	4h	15h	300h
② x2CR123	—	1h15min	3h30min	13h	200h
	220 meters (Beam Distance)				
	12,100cd (Peak Beam Intensity)				
	✓	1.5 meters (Impact Resistance)			
	IPX8, 2 meters (waterproof and submersible)				

NOTE: The above data has been measured in accordance with the international flashlight testing standards ANSI/NEMA FL1, using 1xIMR 18650 battery (3.6V, 3100mAh) or 2xCR123 batteries (3V, 1700mAh) under laboratory conditions. The data may vary in real world application due to battery use or environmental conditions.

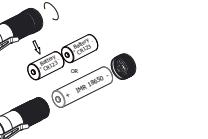

* Runtime for Turbo or High Mode is calculated based on theoretical conditions.

* The IMR 18650 battery requires the use of rechargeable IMR18650 or 18650 Li-ion batteries with output current higher than 8A. If use 18650 Li-ion batteries with output current lower than 8A, the Turbo is not accessible or the Concept 1 will turn off suddenly. And the Turbo is not accessible with CR123A or RCR123A batteries.

Operating Instructions

Battery Installation

Insert battery as indicated in the diagram. Upon battery installation, the light blinks to report battery voltage (refer to the Power Tip section for details) and enters the Standby status.

Warning: 1. Ensure battery is inserted with the positive (+) end pointing to the head of the light. The light will not operate with incorrectly inserted batteries.

2. Avoid direct eye exposure to the beams.

3. If the power tip reports the voltage level of the battery is low, stop using the light and take out the battery to charge.

Mode Selection

The Concept 1 has two operating modes:

• General Mode offers direct access to the Turbo brightness from Standby

• Tactical Mode: offers direct access to the Strobe from Standby

To switch between the General mode and the Tactical mode, following the steps below:

1. Turn off the light. Loosen the tall tail cap for half a turn.

2. Tighten the tail cap while pressing and holding down the side switch simultaneously.

3. The light will blink to indicate which mode has been selected. A single blink indicates General Mode, and two blinks indicate Tactical Mode.

On/Off Operation

Standby Status

Upon battery installation, the Concept 1 will enter standby status.

NOTE: When the product is not in use, it is advised to loosen the tail cap to prevent accidental activation.

When the light is in the standby status:

1. Press and hold down the side switch until the light is turned on to the memorized brightness

2. Tap the side switch twice quickly to activate the ultra-low brightness

3. Tap the side switch three times quickly to enter Turbo in General mode or enter Strobe in Tactical mode

Turn off

With the light on, tap the side switch once to turn it off and go back to the standby status.

Quick access to Turbo:

In any illumination mode, press and hold down the side switch to enter the Turbo. Simply release to revert to the memorized brightness.

Brightness Selection

5 brightness levels are available. When the light is in standby status, hold down the side switch until the light enters the memorized brightness level from last time. Continue to hold down the switch to cycle through "Ultra-low/low-mid-high-turbo".

Release the switch to select and memorize the current brightness level. To reset brightness level, tap the switch once to turn off the light and hold down the switch to cycle through 5 brightness levels.

Special Mode (Strobe/SOS/Beacon)

To enter the strobe mode:

1. When in standby status of tactical mode, quickly tap the switch 3 times

2. When in any illumination status, quickly tap the switch 3 times

In the strobe mode, hold the switch for over 1 second to enter SOS mode; and then release and hold the switch for over 1 second to enter beacon mode. By the same operation to cycle through "strobe-SOS-beacon". To exit the special modes, simply tap the switch once to turn off the light and enter standby.

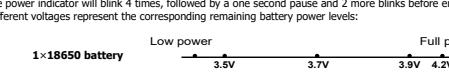

ALTR (Advanced Temperature Regulation)

With Advanced Temperature Regulation module, the Concept 1 regulates its output and adapts to the ambient environment, maintaining optimal performance.

Note: When the Concept 1 is overheated, the turbo cannot be turned on.

Power Tips

When power is off, every time the battery is inserted, the light will report battery voltage (to the nearest ±0.1V) during reporting battery voltage, tap the switch to stop it. For example, when the battery voltage is at a maximum charge of 4.2V, the power indicator will blink 4 times, followed by a one second pause and 2 more blinks before entering the standby status. Different voltages represent the corresponding remaining battery power levels:

Note: when using two CR123/RCR123 in series, the flashlight only reports the average voltage of the two batteries.

Changing Batteries

Batteries should be recharged or replaced if any of the following occurs: output appears to be dim or the flashlight becomes unresponsive.

Maintenance

Every 6 months, threads should be wiped with a clean cloth followed by a thin coating of silicon-based lubricant.

Warranty Service

All NITECORE® products are warranted for quality. DOA/defective products can be exchanged for replacement through a local distributor/dealer within the 15 days of purchase.

After 15 days, all defective / malfunctioning NITECORE® products will be repaired free of charge for a period of 60 months from the date of purchase. After 60 months, a limited warranty applies, covering the cost of labor and maintenance, but not the cost of accessories or replacement parts.

The warranty is nullified in all of the following situations:

1. The product(s) is/are broken down, reconstructed and/or modified by unauthorized parties.

2. The product(s) is/are damaged through improper use.

3. The product(s) is/are damaged by leakage of batteries.

For the latest information on NITECORE® products and services, please contact your national NITECORE® distributor or send an email to service@nitecore.com

※ The Nitecore official website shall prevail in case of any product data changes.

Service de garantie

Todos los productos NITECORE® están garantizados para la calidad. Los productos DOA/defectuosos pueden ser reemplazados por medio de un distribuidor/Dealer autorizado dentro de los 15 días de compra. Después de los 15 días se aplican los productos NITECORE® defectuosos / con fallas que no son reparados libre de costo a partir de un período de 60 meses a partir de la fecha de adquisición.

Después de 60 meses se aplicará una garantía limitada, que cubre el costo de mano de obra y mantenimiento, más no el costo de los accesorios o recambio de piezas.

La garantía es nula en el caso de las siguientes situaciones:

1. El producto(s) es/están dañado, reconstruido y/o modificado por parte de terceros.

2. El producto(s) es/están dañado por uso incorrecto.

3. El producto(s) es/están dañado por fugas de las baterías.

Para la información más reciente sobre productos y servicios de NITECORE®, favor de ponerse en contacto con el distribuidor nacional de NITECORE® o enviar un correo electrónico a service@nitecore.com

※ El sitio web oficial de Nitecore prevalecerá en caso de cambios en los datos del producto.

Garantiebedingungen

Alle NITECORE® Produkte genießen einen umfassenden Garantieschutz. Bei einer Fehlfunktion der NITECORE® Concept 1 Taschenlampe kann das Gerät innerhalb von 15 Tagen bei einem autorisierten Vertriebshändler / Händler innerhalb von 15 Tagen nach Kauf ausgetauscht werden. Nach 15 Tagen kann das Gerät kostenfrei innerhalb von 60 Monaten (5 Jahren) zum Zwecke der Reparatur zu einem autorisierten Vertriebshändler/ Händler geschickt werden. Über 60 Monate (5 Jahre) hinaus deckt die Garantie die Arbeitskosten, jedoch nicht die Kosten für Zubehör- oder Ersatzteile. Der Garantiespruch erlischt beim Einlösen folgende Umstände:

1. Das Produkt wurde durch konsolidative Veränderungen beschädigt oder modifiziert.

2. Der Artikel wurde durch unsachgemäße Gebrauchs beschädigt.

3. Der Artikel wurde durch KTL-GmbH importiert.

Für weitere Details der NITECORE® Garantie-Bedingungen kontaktieren Sie bitte einen regionalen Vertrieb/Händler oder senden Sie eine E-Mail an: service@nitecore.com
